Education

SRM University AP

B.Tech. Computer Science and Engineering / CGPA: 9.41/10.0 / 100% Merit-Based Scholarship

Andhra Pradesh, India

Aug 2024 – May 2028

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Artificial Intelligence, Machine Learning, Statistics, Software Engineering.

VidyaGyan School Sitapur

Class XII: 91.5% / Class X: 95.4%

Uttar Pradesh, India

Jul 2022 – Apr 2024

Work Experience

CCC Digital India Pvt. Ltd.

Product Engineer with AI

Jun 2026 – Aug 2026

- Developed LearnFlow AI serving 20+ beta users with Context-Aware explanations, quizzes, notes, mind maps and simulations.
- Implemented RAG pipelines and LangGraph workflows, improving retrieval accuracy by 25% with LangFuse observability.

Nightech Global

AI/ML Intern

Apr 2026 – May 2026

- Engineered a full-stack GenAI application (Next.js, React, TypeScript, Node.js) that automates 80% of the marketing poster creation workflow by generating brand-matched designs from a company's logo and event details.
- Designed a 15-class waste classification model achieving 93% accuracy and streamlined a regression pipeline to estimate waste weight, cutting manual effort by 90%.

Projects

SentinelAI – AI-Powered Observability & Failure Prediction | Python, React, Shell, Systemd | [GitHub](#)

- Architected an AI-powered monitoring platform processing 500+ system metrics/min and predicting failures up to 10 minutes early with 85%+ forecasting accuracy.
- Created a lightweight CLI agent running as a systemd service, continuously collecting telemetry and triggering automated incident detection.

AI-Based Internship Recommendation Engine | FastAPI, React, Firebase, Vite | [GitHub](#)

- Built a full-stack AI platform (FastAPI + React) that extracts 50+ technical skills from resumes using OCR and matches candidates against 10,000+ internship and course opportunities.
- Engineered a 3-stage evaluation pipeline (resume analysis, coding assessment, and AI voice interview) that reduced manual job evaluation effort by 75% while generating an explainable trust score.

JournIQ – Intelligent Collaborative Learning Workspace | Node.js, WebSockets, Redis, Docker | [GitHub](#) | [Live](#)

- Built a collaborative AI workspace with 15+ productivity features and real-time collaboration.
- Optimized WebSocket communication to support 100+ concurrent messages at sub-100ms latency.
- Containerized microservices using Docker and Redis, reducing response time by 30% and server load by 25%.

Technical Skills

Languages: Java, Go, Python, C++, JavaScript, TypeScript, SQL, HTML/CSS

Cloud & Distributed Systems: AWS, Docker, Microservices, Distributed Systems, REST APIs, Git, GitHub Actions, CI/CD

Frameworks: React, Node.js, Express.js, FastAPI, Flask, Tailwind CSS, Socket.IO

Databases: PostgreSQL, MySQL, MongoDB, Redis

AI/ML: LLMs, RAG, Prompt Engineering, NLP, Computer Vision, Multi-Agent Systems

Software Engineering Practices: System Design, Agile/Scrum, SDLC, Unit Testing, Code Review, Debugging & Troubleshooting, Multithreading, DBMS

Competitive Programming

Peak LeetCode Rating: **1832** | CodeChef: **3★**

Global Rank 664/35k+ (LeetCode Weekly 491) | Global Rank 116/21k+ (CodeChef Starter 245)

Global Rank 21 in AlgoUniversity Coding Competition (20k+ participants)

Solved **1000+** problems across LeetCode, CodeChef, Codeforces and GFG. | [Full Profile](#)

Certifications & Leadership

MongoDB Associate Developer

Apr 2026

AWS Educate ML Foundations

May 2026

AWS Educate Cloud 101

May 2026

Technical Lead – Google Developer Group (SRM AP)

Jul 2025 – Present

Member – Next Tech Lab

Oct 2024 – Dec 2025

Attended fully funded summer schools at Plaksha University (YTS) and Ashoka University (YSP).
